Summary

Senior Database Administrator with 8 years of experience managing PostgreSQL and Oracle databases at scale, with Python scripting for automation and ETL pipelines.

Skills

PostgreSQL, Oracle, Python (scripting and automation), AWS RDS, SQL performance tuning, database backup and recovery, ETL pipelines

Experience

Senior Database Administrator -- Fenwick Data Systems (2018 - Present)

- Managed PostgreSQL and Oracle databases supporting 200+ production applications
- Wrote Python scripts to automate backup, failover, and data migration tasks
- Tuned slow queries across multiple teams' services, improving performance by 40%

Database Administrator -- Coreline Systems (2015 - 2018)

- Administered database infrastructure for an internal analytics platform
- Built ETL pipelines to move data between operational and reporting databases

Education

B.S. Computer Science -- Purdue University (2015)
