Summary

Senior backend engineer with 7 years of experience building high-throughput Python services on AWS, with deep PostgreSQL expertise. Deploys via traditional EC2 and Ansible rather than containers.

Skills

Python, PostgreSQL, AWS (EC2, RDS, S3, Elastic Load Balancing), Ansible, REST API design, database performance tuning

Experience

Senior Backend Engineer -- Ridgeline Software (2019 - Present)

- Built and scaled Python services handling 5M+ requests per day on AWS EC2
- Tuned PostgreSQL indexing and query plans, cutting p95 latency by 50%
- Mentored 2 junior engineers on backend fundamentals and code review practices

Backend Engineer -- Everline Tech (2017 - 2019)

- Built REST APIs for an internal scheduling tool
- Managed EC2 deployments with Ansible playbooks

Education

B.S. Information Technology -- Ohio State University (2017)
